COLOR & GRAIN MATCHING

Different wood species offer unique texture and grain. Variations in finish color and value may occur due to the natural characteristics of wood. Architectural Response Kollection, Inc. carefully selects all materials used in every product to minimize the natural variation in materials. Each color match sample submitted and the furniture you receive may not be an exact match.

When re-ordering furniture for an existing project, where color change has occurred as a natural part of the aging process, please provide sample if color matching is critical.

FABRIC COM

COM is Customer's Own Material. Customer must take full responsibility for selecting, purchasing and shipping COM to Architectural Response Kollection, Inc. All shipments must be clearly marked with the customer's name and customer order number.

A sample must first be sent for Architectural Response Kollection, Inc.'s approval as to whether or not it can be applied on our product.

Your order should indicate which side of the material is to be exposed and if special application instructions apply. Specify the supplier's name, material number and description. If the fabric is a stripe or pattern, specify vertical or horizontal application. In the absence of instructions, Architectural Response Kollection, Inc. will determine the appropriate application.

Yardage requirements shown in the price list assume 60" wide plain fabric.

CARE & MAINTENANCE

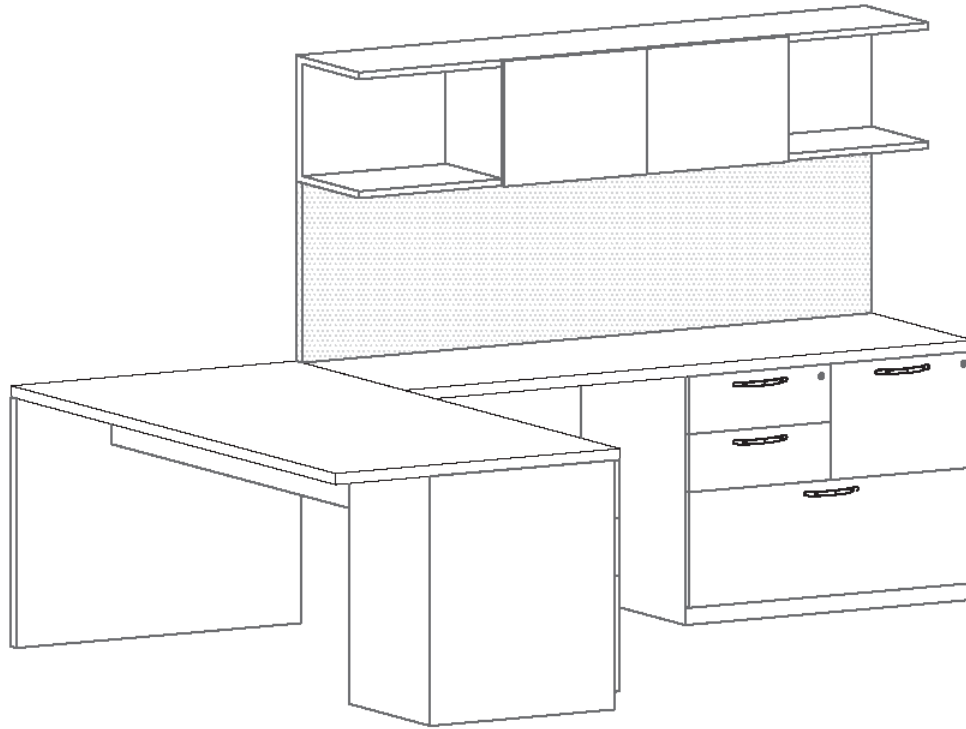

WOOD FINISHES
When cleaning wood, use a soft cotton cloth moistened with a mild soap and warm water solution and dry immediately. Architectural Response Kollection, Inc. does not recommend the use of waxes or polish.

In some cases, the rubber support feet used on the bottom of common office equipment (teleconferencing phones, laptops, microphones, copiers, etc.) can create unsightly marks on the surface of wood tops, due to oxidation of the lacquer finish. We suggest these machines be placed on a protective type of padding, such as felt.

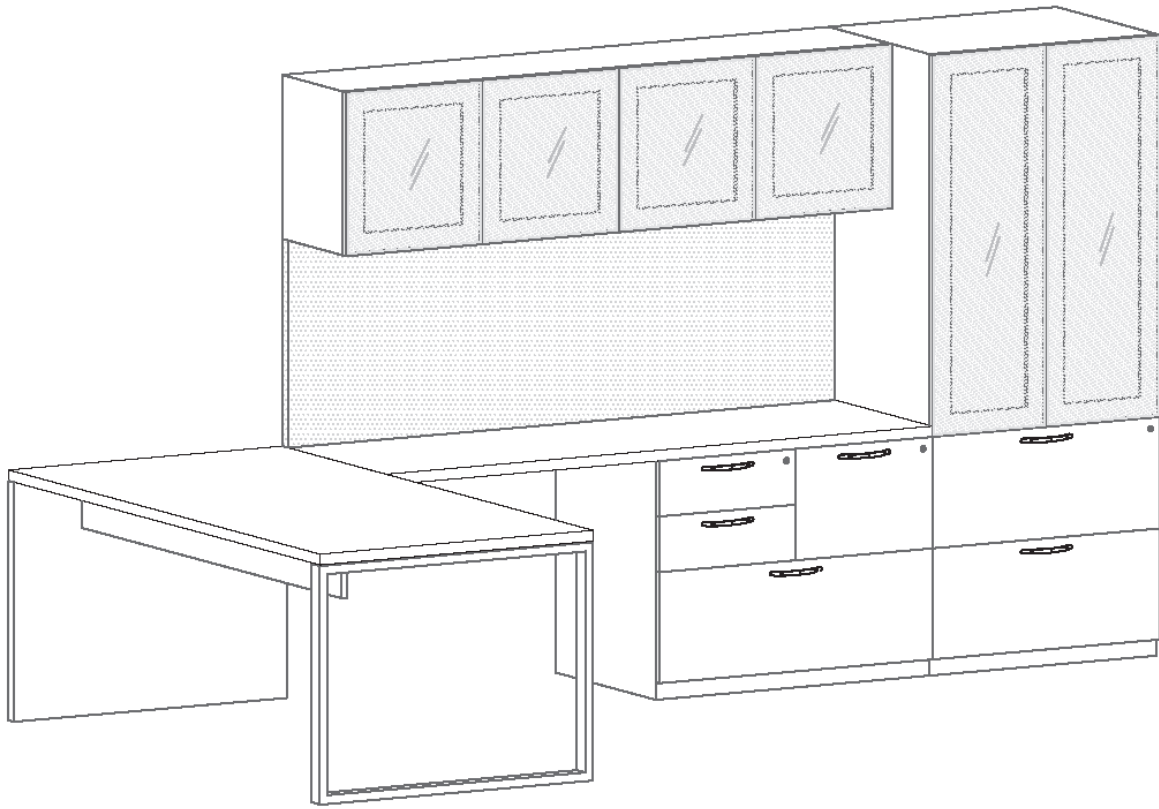

STONE & SOLID SURFACE MATERIAL
Despite its reputation for durability, natural stone can easily be broken during handling and/or installation if proper techniques are not followed. Architectural Response Kollection, Inc. is not responsible for the installation of natural stone or solid surface materials on its products. Therefore, installers specially trained in the installation of these materials must be utilized to ensure a quality installation.

Architectural Response Kollection, Inc. shall not be liable for any damages incurred during the handling and/or installation of natural stone or solid surface materials on its products.
